CONTENTS OF VOLUME 96

No. 1, April 1994

C.R. Wilson, G. Vanelli, S. Magder and S.N.A. Hussain (Canada): Phrenic afferent stimulation by bradykinin and the distribution of the inspiratory motor drive 1

K.R. Eager, B.J. Robinson, D.C. Galletly and J.H. Miller (New Zealand): Endogenous opioid modulation of hypercapnic-stimulated respiration in the rat 13

J.G. Wolsink, A. Berkenbosch, J. DeGoede and C.N. Olievier (Netherlands): Ventilatory interaction between hypoxia and hypercapnia in piglets shortly after birth 25

S.-i. Sekizawa and H. Tsubone (Japan): Nasal receptors responding to noxious chemical irritants 37

H.A. McLean and J.E. Remmers (Canada): Respiratory motor output of the sectioned medulla of the neonatal rat 49

D. Bartlett Jr. and S.L. Knuth (USA): Influence of hypoxia on ventilatory responses to intralaryngeal CO_2 in cats 61

M.-L. Fung and W.M. St. John (USA): Electrical stimulation of pneumotaxic center: activation of fibers and neurons 71

M.-L. Fung and W.M.S. John (USA): Separation of multiple functions in ventilatory control of pneumotaxic mechanisms 83

H.L. Manning, S. Slogic and J.C. Leiter (USA): Tidal volume perception in normal subjects: the effect of altered arterial P_{CO_2} 99

Nos. 2,3, May 1994

N.C. Gonzalez, K. Perry, Y. Moue, R.L. Clancy and J. Piiper (Germany): Pulmonary gas exchange during hypoxic exercise in the rat 111

R. Kikuchi, K. Kikuchi, J. Hildebrandt, K. Sekizawa, M. Yamaya and H. Sasaki (Japan): Bronchomotor agents and hysteresis of collateral resistance in dog lobe 127

J.M. Lawler, S.K. Powers, H. Van Dijk, T. Visser, M.J. Kordus and L.L. Ji (USA): Metabolic and antioxidant enzyme activities in the diaphragm: effects of acute exercise 139

J.M. Bissonnette, A.R. Hohimer and S.J. Knopp (USA): A cholinergic mechanism involved in fetal breathing during the high voltage ECoG state 151

Z. Tomori, V. Donic, M. Kurpas and R. Palenikova (Slovak Republic): Sniff-like aspiration reflex evoked by pressure pulses from the upper airways in cats 163

M.-L. Fung, W. Wang and W.M. St. John (USA): Involvement of pontile NMDA receptors in inspiratory termination in rat 177

E.E. Nattie, A. Li, J. Mills and Q. Huang (USA): Retrotrapezoid nucleus muscarinic receptor subtypes localized by autoradiography 189

R.J. Garland, R. Kinkead and W.K. Milsom (Canada): The ventilatory response of rodents to changes in arterial oxygen content 199

C.S. Packer, R.E. Bennie, D.R. Powell and R.A. Rhoades (USA): Neonatal hypoxia: long term effects on pulmonary arterial muscle 213

B.E. Marshall, W.R. Clarke, A.T. Costarino, L. Chen, F. Miller and C. Marshall (USA): The dose-response relationship for hypoxic pulmonary vasoconstriction 231

A. Breitenbücher, A.D. Chediak and A. Wanner (USA): Effect of lung volume and intrathoracic pressure on airway mucosal blood flow in man 249

K.M. Gilmour , D.J. Randall and S.F. Perry (Canada): Acid-base disequilibrium in the arterial blood of rainbow trout 259

J. Iwamoto, J.A. Krasney and F.C. Morin III (USA): Methemoglobin production by nitric oxide in fresh sheep blood 273
